

Providing Services to Persons  
With Intellectual and Developmental Disabilities

Monday 5-4-20

With the new order from the Governor, our Group Homes will be subject to in-home surveys from the Colorado Department of Public Health & Environment. All staff have been notified and we will fully cooperate with the Governor's order. The surveyors are being COVID tested/strictly monitored before they enter any home and they each have high-grade PPE. They will be limiting their time in the home, it will be less than three hours, but likely closer to an hour and a half. They will be practicing social distancing. They will conduct any follow up with staff remotely.

So if any of you live around or drive by any of our group homes and see people going in and out in full PPE, don't be concerned. At this time none of our residents and none of our staff are COVID positive, so this is just a precautionary survey.
